

## DIY SAFETY KNOCK-OUT SAFETY TIPS

What is happening today is that the sharing of information has become mundane and stereotype, resulting in people switching off and ignoring safety. Employees have become tired of the same old safety routines, audits, systems, practices, etc. A fresh approach is called for.

**DIY SAFETY Knock-out Safety Tips™**  
is the answer to re-energising your efforts with novel ideas.

Shifting behaviour-based safety paradigms is made simple with the unique **Knock-out Safety Tips™** CD.

This is a CD ROM with 150 tips, comprising 24 SHE categories. It empowers management with tasks and ideas which will create an element of fun, involvement and the surprise of discovery – all known to **enhance the learning experience**.

All ideas are based on the 3-F Principle – fast, focused and feedback or follow-up! The tips are easy to follow and implement, and can be used in various scenarios. In today's electronic age, it has never been easier for employers to implement the **'back to basics'** principle!

The **DIY SAFETY Knock-out Safety Tips™** are fully integrated with Microsoft Windows, easy to use with lists of categories and topics as well as a detailed description of the tips themselves. These can be printed, or saved to email. Other features include a query function for word search, graphic images, quick links to other relevant tips, a facility to select already 'viewed' tips and a send a mail to e-Khuluma option.

Help is at hand!

### MY SAFETY GOSPEL

*These three: 'Systems equipment and people – but the greatest of these is people.'*
