# BACK TO BASICS WITH COOL TOOL™ TOOLBOX TALKS

The e-Khuluma COOL TOOL™ range of TOOLBOX TALKS is specifically aimed at raising the awareness and need for action in safety-related matters, by getting the people who “push the buttons and use the tools” to talk about and address relevant issues.

All employers have the responsibility of providing a safe working environment in terms of the OHS Act. This however, is only possible when safe working practices are implemented and enforced. All employees also have a responsibility to work safely in terms of the OHS Act. Safe behaviour ensues by providing appropriate knowledge and information on safe working practices and making sure that these are understood. With **e-Khuluma Electronic Toolbox Talks** employers are able to communicate a visual safety message, leaving a lasting impression. It has never been easier for employers to implement the “back to basics” principle!

e-Khuluma says it all – as it refers to the Zulu word meaning – “let’s talk” – which is the modern approach towards occupational safety.

e-Khuluma’s COOL TOOL™ TOOLBOX TALKS deal with **generic, conventional areas** and **softer skills** associated with workplace safety. By making use of realistic pictures and incidents, by means of a variety of before and after photos, video clips and examples, **employees are reminded of the basics of safety**. A wide range of topics are available covering most issues of safety. However, all topics can be customized to suite individual and organizational needs. Each topic is in the form of a Powerpoint presentation of 15-20 slides. The topics you select are made available to you via a USB flash drive.

By scheduling only 30 minutes a week, you will be able to meaningfully cover one topic of the range. The topics are designed to have an impact on the viewer by means of positive as well as negative **examples of safety practices**. All topics are supported with enough visuals to ensure that the image is a lasting one. Soon you will be able to measure visible results as employees start changing their behavior towards safety!

## MY SAFETY GOSPEL

*These three: ‘Systems, equipment and people – but the greatest of these is **people**.’*

## TOOLBOX TALKS TOPICS:

1. Licence & Module Overview
2. Audits, inspections and check lists
3. Understanding accidents
4. Lifting equipment and cranes
5. Working at heights
6. Lock out system
7. Permits to work
8. Ladders
9. Road safety - pedestrians
10. Enclosed spaces and vessel entry
11. Office safety
12. Eyes
13. Hand injuries and burns
14. Hands - cuts
15. Road safety – seat belts
16. Road safety – attitudes
17. Scaffolding
18. Road safety – vehicles
19. Road safety – road signs
20. Personal Protective equipment

The Licence and Module Overview (train-the-trainer on how to use the series – Topic 1) is required and each topic can be purchased individually.

I am sure that you will agree with me that this is an exciting way to shift paradigms with regards to occupational safety. If you would like a pdf of the demo presentation and / or a quote, please let me know.

Safe regards,

Jürgen Tietz
